

EVGENY SHEPELYUK

Software development professional with 12+ years experience of creating and delivering software solutions. Concentrated on product quality and continuous improvements in all fields, such as development processes, adopting leading edge technologies, building good team relationship and self-education. Agile engineering practices and development methodologies evangelist.

Looking for opportunity of obtaining senior technical position in Java based technologies project. Interested in distributed, high-load and performance critical applications.

Qualification highlights

- successful development of distributed multi-layer cross-platform applications, with massive integration of external services and providers
- providing high availability and performance tuning of software solutions including web sites and standalone middleware applications
- deadline management and project completion on time including startups, legacy application migration and unfinished third-party projects
- successful transformation of development teams into self-organizing, cross-functional feature team by adopting and teaching SCRUM software development methodology and other Agile practices
- hands-on worker attitude both for technical/development activities and management/business analytics activities as well
- improving and injecting QA using continuous integration, test automation and TDD / BDD
- strong communication skills, especially while managing issues between technical and non-technical team members

Education

- Specialist. Diploma with honors, Department of computer and network systems, Chernihiv State Technological University, 2003
- Bachelor, Department of computer and network systems, Chernihiv State Technological University, 1998 - 2003

PROFESSIONAL EXPERIENCE and PROJECT DETAILS

Infopulse Ukraine LLC - Oberthur Technologies

TSM SP v5 (MAY 2013 - Present) - platform that remotely manages installation and life cycle of NFC services on secure elements (SIM cards, eSE) embedded in mobile devices, collaborating with external systems such as TSM MNO or KMS.

- Technologies: Reactive Programming, AKKA Actors, AKKA Persistence, Scala, Java, Server Side JavaScript, Rhino, Jetty, Servlets, JSP, XML, SOAP, JAX-WS, Groovy, Gradle, Spock, JIRA, Jenkins, Docker, MariaDB, Global Platform, NFC.
- Team: 3 scrum feature teams, dedicated QA and Integration teams, analysts, ~25 peoples.
- Role: Tech Lead, Team Lead, Developer.
- Responsibilities
 - Adoption and injection of agile engineering practices
 - Implementing Global Platform Messaging and Global Platform Card specifications
 - Maintain project's reactive and polyglot programming model
 - Collaborating with functional architects and business analyst on defining product architecture
 - Design and implementation of technical solutions
 - Supporting QA team on creating robust testing framework
 - Facilitating Scrum events and supporting team with Agile processes adoption

Ciklum - Playtech Inc.

WPL (OCT 2012 – APR 2013) - platform for creating online gambling web portals (as the company's product)

- Technologies: J2SE, J2EE, Tomcat, JSON, Portlets, Liferay, MySQL, Spring, XML, JAXB, WebDriver, Groovy, Spock, Gradle, Jenkins
- Team: Backend and Frontend development teams, QA team, ~25 people.
- Role: Backend Developer, Build engineer
- Responsibilities
 - Creating build process using Gradle, defining platform release flow
 - Developing and supporting Liferay Portlets
 - Injecting TDD practices and tools
 - Collaborating with architects on defining platform components
 - Support for QA and Frontend teams
 - Creating end-user solutions based on WPL platform

SysIQ Inc.

Telescope.com (NOV 2011 - OCT 2012) - e-commerce portal based on FRY's (about:blank[www.fry.com]) OCP platform.

- Technologies: J2SE, J2EE, Tomcat, JSP, JSTL, MSSQL, Spring, XML, JAXB, WebDriver
- Team: ~7 developers
- Role: Tech Lead, Team Lead, Developer, Agile practices coach
- Responsibilities
 - Working close with local and offshore project management
 - Face-to-face communication with customer representative and requirement analysis
 - Architectural solution and their technical implementation
 - Adoption and injection of Agile engineering practices
 - Establishing unit, integration and functional testing of delivered product
 - Coaching team member for adoption of OCP platform

Luxoft Eastern Europe LLC - UBS Investment Bank

SSENG Clearing & Settlement (2009 – 2011) – Middleware and FrontEnd software for stock exchange market, providing means to process, clear and settle stock exchange trades, manage their lifecycle, gather reports and datas about status of trades as well as integration with external banking systems.

- Technologies: J2EE, RMI, AOP, Spring, JMS, Oracle, GWT, GXT, AJAX, JSON, Groovy, Grails, Selenium/WebDriver, Junit, Hibernate.
- Team: 10 distributed scrum teams of ~10 engineers each, PO team consisting of business analysts and subject matter experts, global production support team.
- Role: Scrum Master, Team Coordinator, Software Architect and Developer
- Responsibilities
 - Scrum process facilitation and coaching
 - Architectural solution creation and their technical implementation
 - Unit, integration and functional testing. TDD/BDD/ADD adopting and coaching
 - Face-to-face communication with customer and requirement analysis
 - Communication and demonstration of developed software to end-users
 - Maintaining continuous integration
 - Release preparation and delivery support

Chas XXI Ltd.

FreedomInput.com (2008 – 2009) – Freedom Keychain GPS 2000 driver and GPS software for BlackBerry phones

- Technologies: J2ME, Java, Bluetooth, RIM API, GPS, HTTP, REST.
- Team: 3 Developers.

- Role: Developer, Architect, QA, Build Engineer.
- Responsibilities
 - System architecture creation
 - Interaction with hardware module using Bluetooth
 - Working in background mode as driver
 - Interaction of driver and user modules
 - Adoption and testing of software for all major versions of RIM OS
 - Creating screens for GPS actions as speedometer, compass, lap counter etc
 - Interaction with social media as Facebook and Yahoo

FreedomInput.com (2008 – 2009) – Bluetooth Keyboard driver for BlackBerry phones

- Technologies: J2ME, Java, Bluetooth, BlackBerry, RIM API.
- Role: Developer, Architect, Analyst, QA, Build Engineer.
- Responsibilities
 - System architecture creation
 - Interaction with hardware module using Bluetooth
 - Implementation of custom actions for Bluetooth keyboard shortcuts
 - Working in background mode as driver
 - Adoption and testing of software for all major versions of RIM OS

Processing and billing (MAY 2009 – DEC 2009) – layer for different payment systems to provide uniform interface for e-shops and similar projects.

- Technologies: REST, Spring, XML, JSON
- Team: Business Analyst, Developer
- Role: Developer, Architect, Analyst, QA, Build Engineer
- Responsibilities
 - Architecture definition
 - Integration with various electronic payment services

Video Streaming Server and Visualization (AUG 2009 – OCT 2009) - HTTP proxy solution for online video to increase logical bandwidth and number of clients bandwidth using proxying of streams.

- Technologies: Spring, REST, Restlet, HTTP/MIME parsing.
- Team: Team Leader, Architect, Developer.
- Role: Team Leader, Developer, Build Engineer.
- Responsibilities
 - Team leading tasks (communication, estimation, control, planning, code review etc.)
 - Creating architecture and developement

RDT600 (AUG 2008 – MAY 2009) - Hardware monitoring and visualization tool RDT600 for SICK AG.

- Technologies: Java EE (JMS, JSP/JSTL, Stripes), AJAX, DHTML/JavaScript/YUI, Spring (JDBC, Security, AOP, Testing), TDD (TestNG), PostgreSQL
- Team: Project Manager/Business Analyst, 2 Architects/developers, 5 Developers, Testers/QA.
- Role: Architect, Team Leader, Developer, DB analyst
- Responsibilities
 - ↪ Team leading tasks (communication, estimation, control, planning, code review etc.)
 - ↪ Creation of system architecture
 - ↪ DB structure creation, analysis and optimization
 - ↪ DB process improvements to achieve extra performance
 - ↪ YUI/JavaScript framework adoption
 - ↪ TDD adoption control and coaching
 - ↪ Data Flow analysis

Eset.ua (JAN 2008 – SEP 2008) – Distributed peer networking application for distribution files required for ESET company products.

- Technologies: Java EE, Spring, JPA, Spring Security, PostgreSQL, REST.
- Team: Team leader, Architect, 2 Java Developer.
- Role: Team leader, Software consulting, Developer.
- Responsibilities
 - ↪ Spring Security adoption
 - ↪ Creation of system architecture.
 - ↪ Team leading tasks (communication, estimation, control, planning, code review etc.)

Eset.ua (MAY 2007 – FEB 2008) – business and financial management system for Ukraine branch of ESET.

- Technologies: Groovy/ Grails, AJAX.
- Team: Team leader. Architect, 3 Java Developer.
- Role: Team leader.
- Responsibilities
 - ↪ Creation of system architecture.
 - ↪ Adoption of Grails framework
 - ↪ Team leading tasks (communication, estimation, control, planning, code review etc.)
 - ↪ UI development

Prydbay.com (JAN 2007 – DEC 2009) – Online Store of communication topups and online games

- Technologies: Java EE, Spring, JDBC, PostgreSQL, Grails, Groovy, XML, JSON.
- Team: 4 developers.
- Role: Team leader, System Architect, Developer, Build Engineer
- Responsibilities
 - ↪ Creation of system architecture.

- ↪ Team leading tasks (communication, estimation, control, planning, code review etc.)
- ↪ 50% Development.
- ↪ External service providers integration.
- ↪ UI analysis
- ↪ Performance analysis

Cloncom.com (APR 2007 – DEC 2007) – High performing RESTful web service providing online product catalogue.

- Technologies: Java SE (Socket, HTTP, Multithreading , Concurrent), Caching (MemCache), REST (Restlet), XML (JAXB).
- Team: 2 developers.
- Role: Developer, Architect, Team leader, Build Engineer, QA.
- Responsibilities
 - ↪ REST architecture adoption
 - ↪ Development
 - ↪ Performance analysis and improvements
 - ↪ Team leading tasks

Cloncom.com (JAN 2005 – DEC 2008) – E-commerce solution for selling various electronic communications, related services and products.

- Technologies: Java EE (Servlet Container, JMS, JSP/JSTL, WebServices REST/SOAP), Java SE (Threading, Sockets, Concurrent Programming), Spring (IoC, AOP), JPA, Caching (OSCache), PostgreSQL, AJAX, XML, JSON, REST, PostgreSQL.
- Team: Team leader, 5 Java Developers, 1-2 Designers, 2 Testers/QA, 2 System Administrators.
- Role: Team leader, Architect, Project Manager, Developer, QA, Build Engineer
- Responsibilities
 - ↪ Creation of system architecture
 - ↪ Team leading tasks (communication, estimation, control, planning, code review etc.)
 - ↪ Development
 - ↪ Integration of payment systems. (PayPal, Verisign, GlobalCollect etc)
 - ↪ Development bridges between system core and external service providers using custom XML/ HTTP communications and Web Services (WSDL)
 - ↪ Integrating with Asterisk and providing IVR solutions for system
 - ↪ UI structure and analysis

Cloncom.com (JAN 2004 – NOV 2004) - IP phone card online store.

- Technologies: Java EE(JSP/Servlets/JSTL), MySQL.
- Team: 3 developers, HTML Designer.
- Role: Developer.
- Responsibilities
 - ↪ Legacy code support

- ↪ Development
- ↪ Performance improvements
- ↪ Offshore customer communication

AAA (JAN 2004 – JUN 2004) - Billing and network traffic accounting system

- Technologies: Java EE(Servlet Container, JSF, JSP/JSTL), PostgreSQL.
- Team: 4 developers.
- Role: Developer, Architect.
- Responsibilities
 - ↪ Architecture analysis
 - ↪ Integration of data from external sources
 - ↪ Web development and JSF adoption

Newsletter engine (FEB 2003 – JUN 2003) – Corporate offline messaging exchange system.

- Technologies: IIS, ASP, VBScript, MSSQL, Stored Procedures.
- Team: 4 developers, HTML Designer.
- Role: Developer.
- Responsibilities
 - ↪ UI reporting creation
 - ↪ Creating reusable components for UI development

Mobile Games server (AUG 2003 – DEC 2004)

- Technologies: Java SE(Sockets), J2ME, MySQL.
- Team: 3 developers.
- Role: Developer.
- Responsibilities
 - ↪ Data exchange between cell phone and server.
 - ↪ UI development

School of Business LLC

(AUG 2001 – FEB 2003) - Development and support of automation management and bookkeeping systems based on products of 1C/Abbyy company.

- Technologies: 1C reports documents and material exchange with Microsoft products.
- Team: 4 developers
- Role: Developer, Functional Analyst.
- Responsibilities
 - ↪ Support of legacy code, development, code reviews
 - ↪ Communication with book keeping customer's team
 - ↪ Import/export of business/financial valuable data
